Constitution, Powers and Functions of the Universal Service Fund Administrator

The New Telecom Policy '99 envisaged provision of access to basic Telecom Services to all at affordable and reasonable prices. The resources for meeting the Universal Service Obligation (USO) were to be generated through a Universal Service Levy (USL), at a prescribed percentage of the revenue earned by the operators holding different type of licenses. Further, NTP '99 envisaged implementation of Universal Service Obligation for rural and remote areas through all Basic Service providers who were to be reimbursed from the funds collected by way of USL. Other service providers were also to be allowed to participate in USO provisioning subject to technical feasibility and were to be similarly reimbursed out of the funds of USL.
